The Offering Table of $Hwy \text{ from the Twelfth Dynasty (RC-2990)}$  

Ehab Gamil Abd El Karim  
Department of History and Archeology, Faculty of Arts,  
Benha University, Egypt.  
Ehabgamil2013@yahoo.com  

**Abstract:** The current paper is concerned with the study and publication of an unpublished offering table (RC-2990) in the Rosicrucian Egyptian Museum in San José, California, USA. The present article analyses offering table (RC-2990) dated to the Middle Kingdom, specifically the first half of the 12th Dynasty. Unfortunately nothing is known about its provenance, but according to the museum files RC-2990 was purchased from Sotheby’s New York on November 29, 1989, Lot 144A, and Sale 5940. Yet its provenance is unknown. This article will discuss describing the scene, and translating the accompanied texts. The commentary will consider the names and titles of the deceased.  

**Keywords:** Offering table, offering formula, Twelfth Dynasty, the soul, bread, offering basins, offering rituals, bull’s leg $\text{ḫpš}$.  

**الملخص:** يتناول البحث دراسة ونشر لائحة قرابين غير منشورة رقم (RC-2990) في المتحف المصري روزيكرسيان في سن خوسيه بولاية كاليفورنيا الأمريكية، والتي يملك تأريخها إلى عصر الدولة الوسطى، وتحديدا النصف الأول من الأسرة الثانية عشرة، مصدر هذه اللائحة غير معروف، ووفقًا لمجلات المتحف تم شراؤها في ٢٩ نوفمبر ١٩٨٩، ويقدم البحث دراسة تحليلية للنصوص المسجلة على اللائحة، والتعليق عليها من الناحتين الفنية واللغوية، وسيأخذ التحليل في الاعتبار أسماء وألقاب المتوفى، ووصف العناصر المُصوّرة عليها مع تناول البدع الدينية لهذه العناصر.  

**الكلمات الدالة:** لائحة قرابين، صيغة النقدمة، العالم الآخر، الروح، الأسرة ١٢، أحوال القرابين، طقوس التقدمة، $\text{ḫpš}$
1. Introduction:

Offering tables were important items of funerary equipment throughout ancient Egyptian history, and usually been found inside burial chambers. In the ancient Egyptian language a number of words are used to designate them, the most common being: *htp*, which appears in the texts of the Old Kingdom, and the purpose of the offering tables was to supply the deceased with offerings necessary for him in the other world, which means the return of life to him as a personification of the God Atom, the creator of the universe and the donor of the ways of life.

The idea of making offerings goes back to prehistoric period, and the offering table is depicted in the early Dynasty. Period in the decorations of tombs and in the temples, as they were depicted on the Stelae, offering tables were used from the first Dynasty or before, to guarantee the safety of the soul of the deceased in the afterlife through various types of offerings depicted on their surface.

This research aims to study and publish the offering table (RC–2990) in the Rosicrucian Egyptian Museum, California, USA (Fig.1). The research presents an analytical study with the texts recorded on the table and comments on it from an artistic and linguistic point of view, describing the scene, and translating the accompanied texts. The commentary will consider the names and titles of the deceased.

3 Maha Mostafa, *Untersuchungen zu Opfertafeln im Alten Reich* (Gerstenberg, January 1, 1982), 151-170.
5 *LÄ* IV, 583.
8 The publication was based on the approval of Dr. "Julie Scott" (Executive Director of the Rosicrucian Egyptian Museum) on 17/ 7/ 2020.
9 This museum is located in the city of San José, California, and this material was purchased from an auction room in New York on the 29th Nov. 1989 and its number in the room was (144a), and it was sold under the reg. number 5940.
The offering table is a square stone piece made of limestone (Fig.2) with dimensions of 33× 39.7× 4.5 cm. On the top of the table is an inscription depicting a conical bread loaf (šns) on a roll of papyrus in the form of (ḥtp) sign in hieroglyphics with two vessels (ḥsy) in high relief, beside each of them a round bread loaf (psn).

The bull’s leg (ḥps) appears in a high relief, and the four sides of the table are rounded by a frame of sunken hieroglyphics, the table is polished and the inscription is good, the base is well-finished, and it is almost intact. Nevertheless, there are some slight scratches on the edges of the table on the four sides. There is damage to the lower left corner surface and erosion on the left side of the table, which didn’t significantly affect the legibility of the inscriptions, and the part of the drain of the table is missing.

In the upper part of the table there is a recessed carving representing two deep rectangular purification basins, and approximately in the same size, and the edge of each basin is graded into several levels, wide from the top and narrow as it descends, and these edges may symbolically represent edges in a lake when the water gets trapped or reduced.

The function of these basins was to receive the liquid offerings of water, beer and wine, symbolizing the sacred lake of the temple, and the eternal ocean (Nun), which symbolically turns into a large lake, in which the deceased makes his trips to the other world as he did during his lifetime, that means, it is a sacred lake for the sun God who will be reborn and give the deceased himself a new birth in the afterlife, besides, the practical function of these basins is to preserve the liquid offerings performed by the rituals at the table.

3. The Offerings:

Six offering items in raised relief are arranged on the offering table as follows:

(a) Conical bread (šns): Bread was a main element in the ancient Egyptian daily life, and their religious beliefs and other rituals. The lists of offerings are hardly devoid of both bread which has a symbolic significance associated with the

7 Wh, IV, 516, 4-12.
8 LÄ I, 1975, 871.
continuity of life in the other world\textsuperscript{1}, it also includes protecting the deceased from being forced by the absence of bread on his offering table to eat his own filth, which is a sinister fate for the deceased\textsuperscript{2}.

Various kinds of bread were found, which were used for temple offering tables\textsuperscript{3}, and presenting bread as an offering was playing a major role in funeral rituals, not only in the inscriptions of the stelae and offering tables, but also in the temples, and there are inscriptions depicting the king offering conical bread loaves to the deities\textsuperscript{4}.

The conical shape of the bread loaf appeared on the sign of "ḥtp\textsuperscript{5}", and this type of bread was mentioned in the offering lists during the Old Kingdom\textsuperscript{6} and Middle Kingdom\textsuperscript{7}, and the depiction of the conical bread on the offering table on the "ḥtp\textsuperscript{6}" sign symbolizes the eternal hill, as it symbolizes the first emergence and it is therefore a symbol of resurrection\textsuperscript{7}.

This kind of bread is always offered to Gods in order to be pleased and to avoid their anger\textsuperscript{8}, as many scenes pictured in the temple of Dendera showing this kind of bread\textsuperscript{9}.

(b) **Round bread \(\text{ psn}\textsuperscript{10} \)**: Two loaves of round bread are depicted on the offering table, this bread is prepared from barley, this kind of bread was mentioned since the Old Kingdom in the offering lists during the 5\textsuperscript{th} and 6\textsuperscript{th} Dynasties\textsuperscript{11}. This type of bread was used on a large scale and was recorded on the offering lists during the Middle Kingdom\textsuperscript{12}, and it was decorated with small circles or points\textsuperscript{13}.

(c) **The two vessels \(\text{ ḫsy}\textsuperscript{14} \)**: The vessel (ḥsy) appeared since the predynastic period\textsuperscript{1}, period\textsuperscript{1}, as a funerary object of the deceased in the tombs during the Old Kingdom\textsuperscript{2},

\textsuperscript{14} Wh, III, 154, 1 3. for more information about this vessel and its material and its depiction on the stelaes See: Radwan, "The  npm-Vessel", 212-213; Peter Lacovara, Vessels, in D. Redford (ed.), the Oxford Encyclopedia of Ancient Egypt, Ill (Cairo and New York: 2001): 481; Donald Spanel, Palaeographic and Epigraphic Distinction between Texts of the So-called First Intermediate Period and the Early
Kingdom\(^2\), and appeared as a hieroglyphic sign in the Pyramid Texts\(^3\), and also represents the sacred vessel of the God Amun\(^4\), and cold water was placed inside it for the purpose of purification\(^5\), and the function of placing this vessel on the offering tables was to purify the offerings on which water has been spilled in front of the deceased.

**(d) The bull’s leg** \(\text{ḫpš}\)\(^6\). The bull's leg offering refers to what Horus had done by cutting the leg of the bull, in which the God Seth was represented, in order to prevent his evil\(^7\), and this progress dates back to the Old Kingdom\(^8\), and it appeared on the walls of tombs and temples, stelae and offering tables\(^9\), as it was also mentioned in the Pyramid Texts\(^10\). The depiction of the bull's leg on the offering table is considered as an important source of food for the \((k3)\) of the deceased with other kinds of offerings, which helps for the revival of the deceased, and to transmit the strength back for his mummy by granting him with the magical power through this vibrant member, as this part of the bull represents his strength, so this power is transferred from the bull to the deceased, to whom the offering was given, and then his mummy can move again in the other world\(^11\). The bull’s leg \((\text{ḥps})\) is associated with the ritual of "opening of the mouth" and it is a determinative to the word \((\text{msḥtyw})\), which is one of the tools for "opening of the mouth" ritual\(^12\). The leg of the bull, after separating it from the body of the bull, was also brought closer to the mouth of the mummy, giving it life and strength. The ancient Egyptian linked the formal features of the leg of the bull with the group of stars known as the "Big Bear", which symbolize (according to Roth) the resting place of the good spirits of the deceased, and which give the deceased the ability to be reborn, and thus achieve immortality and eternity, i.e. the eternity of these stars\(^13\).

“\[1\] A boon which the king gives for Anubis, who is upon his mountain, and who is in the place of embalming, the master of the cemetery (literally: the sacred land), [2] (hopefully) that he offers water, beer and incense for the \([k3]\) of the honored [3] \[Hwy \text{ } \text{ } \]"justified" [4] by his son, the High Priest, S-sj, "justified" [5] Whose name revives on earth."

6. Comment:

(a) \[htp \text{ -} \text{di-nsw} \]: The offering formula means: A boon which the king\(^{2}\) gives to the God, God, then the God in turn gives it to the (Ka) of the deceased\(^{3}\), and it gives the meaning: meaning: “the king is pleased”, and “he gave” as a sentence, must have the verbal past as an expression of the wish of the deceased\(^{4}\), and this Formula was developed and the arrangement of the signs in the form became common in the form of \[\text{ } \text{ } \text{ } \] since the Old Kingdom (4\(^{th}\) Dynasty)\(^{5}\), it was written in the form \[\text{ } \text{ } \text{ } \]1, or in the form \[\text{ } \text{ } \text{ } \]2, in the

1 See more about this formula generally in; Barta Winfried, Aufbau und Bedeutung der alägyptischen Opferformel Glückstadt (New York: J. J. Augustin, 1968); Günther Lapp, Die Opferformel des Alten Reiches unter Berücksichtigung einiger späterer Formen, Mainz am Rhein: (Philipp von Zabern, 1986).
4 Aisha Abdalnal, "Stelae of the Middle Kingdom Individuals, Collection of the Egyptian Museum in Cairo" (Unpublished Master diss., Faculty of Archeology- Cairo University, 1995), 265. (in Arabic)
the 12th and the 13th Dynasty, but the sign is missing its underline in its writing, as it is written on the table in this form, the verb (di) is passive, and the functional role of the offerings formula was linked to the king’s role for ensuring the offerings as a mediator between the human beings and deities, thus ensuring that the deceased benefits from the offerings made in the name of the king to the God, and then obtaining the means of immortality in the afterlife.

(b) Inpw: God Anubis appeared on the offering table in the form of a jackal lying on his chapel, the form on which it appeared at the end of the Old Kingdom, since the reign of Pepi I, and its use was popular in the 11th Dynasty. During the reign of King Intef II, and the name of Anubis continued to be called in the form (hpt- di- nsw) until the reign of Amenemhat III. In the 12th Dynasty, and Anubis was called for the importance which he gained, making sure that the deceased has a new spirit in the other world.

(c)(tpy Dw.f: "who is upon his mountain" is one of the titles and attributes of God Anubis in the offerings formulas, and appeared since the 5th Dynasty, and the title (tpy Dw.f) appeared on the offering table –the subject of the study- without the acoustic complement (ḏw) in the form, and the arrangement of these signs in this way appears rarely on the offering tables and stelae, so they always appear in the form or in the form, and in rare cases also in the form.

7 Fischer, Egyptian Studies II, 63-70.

8 Edward Brovarski, Akhmim in the Old Kingdom and First Intermediate period, Mélanges Gamal Mokhtar (Cairo: IFAO, 1985): 146, n. 90.

11 Winfried, Aufbau und Bedeutung, 15; Margaret Murray, Saqqara Mastabas (London: British School of Archaeology in Egypt and B. Quaritch, 1905), pls.7. 18.

12 The acoustic complement was added after (ḏw) in the end of the 1st Intermediate Period: Azzam, "Stela of Tim Ppjj", 60.

13 We have another example, in which the title appeared in this form on the offering table discovered in Abu Qurqas in 1970, dating to Graeco-Roman Period, reserved in the store museum in el Ashmounin holding Nr. 242, Reg. 3, serial 2931; for more information about it See: Ahmed Al-Garhi, "Studying the tables and basins of offering in the Magazine of el- Ashmounin" (Unpublished Master diss., Faculty of Arts - Minia University, 2019), 50 ff. (in Arabic)

(d) **imy wt**: this title was written without the sign ꞌ and the sign 𓎑 in the form 𓎒𓎑𓎒, and the sign ꞌ appeared on the coffins of the 10th Dynasty, and the beginning of the 11th Dynasty. As it was found on the stelae in rare cases.

(e) **nb 𓇩 dsr**: Lord of the cemetery (literally: the sacred Land) is one of the titles of God God Anubis and has appeared since the Old Kingdom.

(f) **mw**: purification’s water is one of the elements of offerings, and its function was to purify the offerings, and to help symbolically for the quick rebirth of the deceased, like speeding the birth of baby in the process of child-birth.

(g) **hnk(t)**: beer which started to appear in the lists of offerings on stelae since the second dynasty the word is incomplete on the table and missing the signs ꞌ.

(h) **sntr**: Incense function as an offering was to purify and exorcise evil spirits from the place.

(i) **n k3 n**: This formula was associated with presenting the offering, and was the sentence of calling the soul. The beginning of writing the phrase n k3 n im3ly before the title and the name of the deceased in the offering formula htp-di-nsw on offering table and stelae dates back to the early 12th dynasty.

(j) **im3l**: This word appeared on the table in the form ꞌ and it seems that the writer was referring to the sign ꞌ instead of ꞌ, so that the word becomes in the form m ꞌ in the meaning of "honored". The form of the word changed from "im3lyw" to "im3ly" during the reign of King Merikare, and in the 14th year of the reign of King Montuhotep II in Thebes, this title appeared since the 4th Dynasty, and this character has been associated with the deceased since the reign of Senusret I. The two expressions (n k3 n) and (im3ly) are used together in the 12th Dynasty. It is worth mentioning that the title im3ly or im3lyw started to disappear after n k3 n in the reign of Senusret I. The disappearance of this title is attributed to change in religious belief, whereas the deceased was no longer given the worldly title of reverend, but became a spirit in reference to his destiny in the other world.

156
The Offering Table of ḫwy ♂ from the Twelfth Dynasty (RC-2990)

(k) ḫwy ♂: The direction of the name of the table’s owner in the form ḫwy ♂ is incorrect, and the right one is ḫwy ♂, and because of the title "hm ntr ♂" the "High Priest" associated with the name of his son "S-sj" mentioned on the table, it appears that the table belongs to one of the high priests, and it was a family working in the priesthood. The accuracy of the inscription, the quality of the writing, the refinement of the table and the quality of the limestone indicate that the deceased owner of the table was one of the distinguished personalities who held an important position namely in the priesthood, and it seems that this table was placed by the priest's son "S-sj" in the tomb of his father (ḥwy ♂) after his death.

(l) m3$h hrw: The addition of the title "m3$h hrw" justified, is a kind of honor for the deceased, indicates that the deceased passed (the weight of the heart) and was allowed to enter the other world, and that he became a God by taking the title of "justified" or "The Righteous".

7. Dating:

It is possible to determine the date of this table according to the artistic features and the style of writing, wherein the shape, the offering table RC-2990 corresponds to the type (B+ C) in the classification of "Hölzl" for offering tables (Fig.3), this kind is a stone table that combines the "ḥtp" sign with a deep basin on its surface.

In a linguistic point of view; Anubis was one of the deities that was called in the offering formula starting from the 4th Dynasty. Until the 12th Dynasty, and by the reign of Amenemhat III, Osiris became one of the most famous deities in the offering formulas on the offering tables and on the stelae, as the two expressions (n k3 n) and (imḥj) appeared together on the offering tables during the 12th Dynasty, in addition to the appearance of the arrangement of the signs in the form ⲧ ⲧ in the formula of (ḥtp-di-nsw) on the table, it was written in this way during the 12th Dynasty.

According to the above-mentioned suggestions, this offering table dated back to the Middle Kingdom, specifically the first half of the 12th Dynasty.

8. Provenance:

Regarding to the shape of the table, the style of writing, the offerings depicted on the table and the material which the table was made from, is compatible with the group of upper Egyptian tables, especially those discovered in Assiut, Deir Al-Bersha, Tuna Al-Jabal, Sharona, Al-Bahnasah and the region of Sheikh Ebad (Tab.1). Finally, the offering table RC-2990 could be added to the corpus of Upper Egyptian offering tables.

---

4 This title was also written in these next forms: Ⲫ ⲧ ⲧ ⲧ ⲧ ⲧ ⲧ ⲧ. For more information about this title; See; James Allen, Middle Egyptian: An Introduction to the Language and Culture of Hieroglyphs (Cambridge University Press, 2000), 95; Anthes Rudolf, “The Original Meaning of M3$h hrw”, JNES 13, No. 1 (1954): 50.; Alice Grenfell, Egyptian Mythology and the Bible, the Monist, 16 (2) (1906): 169-200.
5 Allen, Middle Egyptian, 95.
Table 1. the style of writing in RC-2990 and the group of upper Egyptian tables from Middle Kingdom

**Conclusion:**

The offering table RC-2990 testifies a devotion to ḫwet ɟ3 one of the high priests of the 12th Dynasty, it was deposited there by his son S-sj. Currently we do not know under what reign he lived.

In its final result the paleography of the offering table RC-2990 and its style, one may assign it to the first half of the 12th Dynasty. From the iconographic point of view, the scene and text portrayed in the offering table RC-2990. The most striking one is in the fact of placing one episode within a single theme; it is properly related to the supply of offerings, food and drink, in order to provide for the needs of the deceased in the hereafter (represented by Father: ḫwet ɟ3) and the tendency during Middle Kingdom was towards subordinating all the representation to this ceremony carried out by the relatives (represented by the son: S-sj). The offering table and formula are the clue elements in the symbolic association with the afterworld; RC-2990 clearly marks the border between the world of the living and the world of the dead.

**Acknowledgment:**

I extend my sincere thanks and appreciation to museum Executive Director Julie Scott for her generous approval for publishing and also for supplying the researcher with some details of purchasing this offering table, the date and its registering numbers for this purchase. I also offer my thanks and gratitude to Lorraine Katich (Director of Operations at the Rosicrucian Egyptian Museum) for her cooperation and assistance for sending a high quality picture of this offering table, and I am indebted to Joshua Norman Publications Manager at the Rosicrucian Egyptian Museum for checking my English.
